

# Never Look Back

Cemetery Skyline

We've never had  
What we were prepared to lose  
We never felt the need to say goodbye  
There is no more to mine from shallow thoughts  
Our faces told the stories  
We were good to go

Another thing that should not happen  
No one knew until we finally said goodbye  
And never looked back  
And what was here is gone forever  
No one asked and no one cared enough  
To figure out why  
And find the answers inside  
We never looked back

We spent our hours  
Inside what seemed to mend  
Our battered egos and our self inflicted pain  
Can there be more to take from what is never given  
This house of mirrors  
Has got to go, it's got to go

Another thing that should not happen  
No one knew until we finally said goodbye  
And never looked back  
And what was here is gone forever  
No one asked and no one cared enough  
To figure out why  
And find the answers inside  
We never looked back  
We never looked back

When there was nothing we could do  
This innocence was gone too soon  
We carried the fire on through the storm  
There is nothing left for us to say  
Choices came and choices went away  
We carried the fire  
On through the storm

Another thing that should not happen  
No one knew until we finally said goodbye  
And never looked back  
And what was here is gone forever  
No one asked and no one cared enough  
To figure out why  
And find the answers inside  
We never looked back  
We never looked back
