

Yes! Legitimate

Cerebral Turbulency

I join people who clamour
For the legalization of marihuana
I can't see any reason why to be scared of it
Or are you going to declare
That Holland and Belgium
Have legalized a dangerous drug?
I myself would rather
See my child to suck a joint than to
Get drunk legally
The drugs have been here
And will always be here
You have to know the difference between them
It's wrong to arrest someone for something which is common
Somewhere else!
