

## Exit Fears

### Ceremony

You told your friends you were fine  
You thought you were fine too  
You told your family twice  
How you had climbed up

But nothing in this world is fine  
Nothing ever feels right  
You have to tell yourself you tried  
You tried  
You tried  
You tried  
You tried

The pain will leave in the night  
Memories return in the light  
The pain will leave in the night

No one would find out  
No one would find out

It started as a way to get by  
You thought you'd survive through  
You were lonely and wanted to die  
That's just a weight you confide

But nothing in this world survives  
Nothing ever feels right  
You have to tell yourself you tried  
You tried  
You tried  
You tried  
You tried

The pain will leave in the night  
Memories return in the light  
The pain will leave in the night  
Memories return in the light  
The pain will leave in the night

No one would find out  
No one would find out  
No one  
Would find out
