From Another Age

Ceremony

Coming from the planet sun
Falling on everyone
Stuck inside a self-machine
Trying to find a way to exist

From another age
From another age within
From another age
From another age within

I don't know how
To leave the past and not walk back
It's pitch-dark almost black

From another space
From another space within
From another space
From another space within

The people I left behind
They were my destiny
I don't wanna fall in love again
And hit the ground bleeding

From another place
From another place within
From another place
From another place within

From another age
From another age within
...
