

You and I, we run together through the skies
We can see the chaos in their sad eyes
When we're here - all is calm
There! We can see our home!
Hurricanes are raging, but our lives find us together

Sometimes I really feel, like we
Can't understand our whole life
What's going on out there, down on the sea
When on the angels' wings, we fly
So high, above the wind and clouds
Did our lives lose their sense, and their light?

Do you feel it , can you see, that was just a moment

As they say, it will soon be back
Again people, they will return
Everyone has their way of life
A mission that must be complete
And now when you take my hand
You give me your smile, do you feel it, can you see...

Do you feel it, can you see , that was just a moment
Can you feel it, do you see, that was just a moment

Sometimes I really feel, like we
Can't understand our whole life
What's going on out there, down on the sea
When on the angels' wings we fly
So high, above the wind and clouds
Did our lives lose their sense, and their light?
Do you feel it, can you see, that it was just a moment

Do you feel it, can you see , that was just a moment
Can you feel it, do you see, that was just a moment

I am safe now, because I know, It was just a dream of my wild heart
Somewhere in my mind, I still remember, human lives and their pain
Love can be like a deadly poison
But they will tell you, it so sweet
Do you feel it, can you see, can you feel it, do you see...
