Believe

Chalee Tennison

I think, I think I got it under control
Then a curve ball hits the glass
And the world comes crashin' down

We stand, staring at a fork in the road
Lookin' down two long lonely paths
Why can't we just turn around

(Chorus)
And believe every fight uphill is worth it
Every teardrop has a purpose
It just clears your eyes to see
Believe storms don't last forever
What don't kill you just makes you better
Oh baby, believe

We say, we say so much that we regret
And we leave so much unspoken
Still we can't see what's missing

But our hearts know exactly what to do
As they cry out in the dark
Why can't we just stop and listen

(Repeat Chorus)

Faith in me and faith in you
Hope's alive if only you
Believe

Believe storms don't last forever
What don't kill you just makes you better
Oh baby, believe
Believe
Believe
