

# Finding My Way Back To You

Chanté Moore

I'm missing you.

I remember, when the nights were long,  
and we layed so close, warm in each others arms,  
warm in each others hearts,  
now it's a memory, lost inside a dream,  
we just couldn't reach.

I don't understand why we're apart,  
Life has no beginning 'til I start...

Finding my way back to you (finding my way back),  
baby, my heart leads me to you (I'll be finding my way back).  
Finding my way back to you,  
and what I always knew,  
loving you could never be wrong.

You're always sayin',  
you have a life that you (that you), must give up just to (just to),  
just to make it work, making it work for us.  
Baby, if we hold on there is no storm (no storm),  
we can't overcome,  
all I'm holding now is emptiness,  
with a love so strong, it comes to this.

Finding my way back to you (finding my way back),  
baby, my heart leads me to you (I'll be finding my way back).  
Finding my way back to you,  
and what I always knew,  
loving you could never, never be wrong.

Finding my way (finding my way back),  
ooh (I'll be finding my way back),  
ooh (finding my way back),  
(I'll be finding my way back)

I don't understand why we're apart,  
Life has no beginning 'til I start...

Finding my way (finding my way back),  
baby, my heart leads me to you (I'll be finding my way back).  
Finding my way back to you,  
and what I always knew,  
loving you could never, never be wrong, ooh.

Finding my way, yeah, yeah, yeah (I'll be finding my way back),  
my heart leads me to you (finding my way back),  
yeah, yeah, yeah (I'll be finding my way back),  
'cause I need you baby,  
finding my way back to you,  
'cause I'm missing you,  
loving you could never, never, never, never be wrong.

(Finding my way back),  
(I'll be finding my way back),  
can't you hear me calling (finding my way back),  
can't you feel me, can't you hear me calling (I'll be finding my way back),

I've been searchin' for so long (finding my way back),  
sometimes I feel so all alone (I'll be finding my way back)
