

First Love

Chapel

You've got kids and I go to bed by nine
Smoke and drunk some whine
And think about us
Think about all the times we had
When we were young and we were bad
But I think that you should probably just leave

You'll always be my first love
First love
There's no one like you
There's no one like you

You'll always be my first love
First love
There's no one like you
There's no one like you

Damn this couch is nice
Feels just like 09
We were doin' just fine
Have you thought about us?
Cause I know that y'all ain't cool
Use to kick it by my pool
All the things we use to do
Wish it was just me and you
But your husband is my friend
I use to babysit your kids
But I think that you should probably just leave

You'll always be my first love
First love
There's no one like you
There's no one like you

You'll always be my first love
First love
There's no one like you
There's no one like you
