

# Neverland

Charles Hamilton

It seems like the signs are getting clearer  
The time is gettting nearer  
I finally can hear ya, when you speak  
As a whisper, through the view of the wind  
I want you to do it again  
I'm your true blue friend  
The Music is when  
I get to prove to you how true it begins  
Where am I? Somewhere asking, "Where are you? "  
"Does your man care for you? "  
That's what I'm here to do  
Spend a lifetime telling you how sweet you are  
Through sex and questions, see how deep you are  
I believe you are  
I know you wouldn't say what you say, everyday  
If your words were just play  
But you don't say shit, it's all vibes  
And it only looks real, when the crystal ball shines  
Spending all time of the night in a day dream  
Thoughts of you make me trip across time

You take me out of this world, I live in  
(Never Neverland, Never Neverland, Never Neverland)  
You gon' always be my girl in  
(Never Neverland, Never Neverland, Never Neverland)  
Let me take you to the sky, we can  
Never Never land, Never Never land, baby hold my hand.  
I can be your man, I can make you understand  
Baby, let's land in Never Neverland

It gets cold standing outside your window  
Especially when I don't know your zip code  
To put in the GPS, drive to you  
I don't know where you at  
But let me fly to you  
Why do you, seem so elusive  
Thoughts of you are like my dreams into music  
Ever present, I have a heaven fetish  
God is a woman, bring me to life. Evanescence.  
Be my immortal lover, wrapped in your mortal covers  
Supernatural spirits  
Human bodies lovin' more than others, love eachother  
Let's be the love that they say I'd never get  
They expect me to bug  
But no couple could be as sexy as us  
Especially 'cause, God bless we. Much  
'Cause, us can be led to winnin' a race  
What we got is bigger than space  
Get it?

You take me out of this world, I live in  
(Never Neverland, Never Neverland, Never Neverland)  
You gon' always be my girl in  
(Never Neverland, Never Neverland, Never Neverland)  
Let me take you to the sky, we can  
Never Never land, Never Never land, baby hold my hand.  
I can be your man, I can make you understand

Baby, let's land in Never Neverland

I know, I sound like I thought this through  
Well, I didn't. I just needed this talk with you  
When all this is through and we fall into true love  
Will I be the one to get all of this screwed up?  
What happens when the groupies crawl on my two nuts  
Not coming back until August is too much  
And bloggers are rude, any sorta problems  
Would be the talk of these poo-putts  
It's awful but far from new to us  
Just promise you'll be gentle  
I'm sensitive. My weakness is sweetness  
I don't give a shit  
After a long day, rub my head  
My favorite Incubus song play  
And the bong's gray, full of smoke  
High, I'm full of hope. That's the could that I'm on  
And it's not bullet smoke  
Don't be a murderer  
Feel me?

You know, I think.  
I think somebody gotta come up with a better word for special.

Let's just zone out.  
I don't even care if it's on beat anymore.  
Let's just zone out
