

# Starchasers

Charles Hamilton

If no one understands me  
Then lie and say that you do  
I can make it the truth  
Just buy it, save it, and use it to live  
We all know I need music to live  
But the beauty of it is:  
You too can move your fist in the fight  
Right?  
All you gotta do is write  
And if at all possible, we gotta move the light  
Make it shine where we want it to  
In front of you  
I been watching the stars since the days I wasn't under roofs  
The stars in the sky are the stars in the screen  
A part of me believes I have a heart that doesn't beat  
It's "a capella"  
My mind provides the drums  
And I don't mind the dumb cause they minds gotta be numb  
To not feel what I'm bringing  
I might stop  
If when I dream I can't see what the night's got  
And I just hit the right spot  
You like that?  
Then come watch

And you can be my starchaser tonight  
Don't be afraid of how fast you go  
You can see as far as lasers and lights  
Close your eyes and let it all go  
(Meet me in outerspace)  
Let the good times roll  
(I will hold you close)

Over your head like a planet  
But clear like a bandage  
To cover such unclear damage  
What you see is what you need to believe  
How ironic; I don't believe in myself, I need to get help  
Crying out over the beats for myself  
The smile in your eyes is nothing but lesions and whelps  
But lesions have felt what I bring, so that helps  
Dreaming of belts  
I gotta be the champ  
"He's the man, " is what they must say  
What way could I give up, the 'up' way  
If I give up, I show love to the sky  
When you give up it's like saying "fuck it and die"  
I've had enough of the lies so catch up cause it's time  
Fine  
My mind will not stop ticking  
It's not a clock, stop trippin'  
This is a hot written  
I'm the one that the stars shine for  
I'm more than a leader, I'm gravity times four  
So hold me down

And you can be my starchaser tonight

Don't be afraid of how fast you go  
You can see as far as lasers and lights  
Close your eyes and let it all go  
(Meet me in outerspace)  
Let the good times roll  
(I will hold you close)

The breeze never lies  
The disease in my mind needs to recline  
Chill, I will be there in time  
Where is there?  
Here, top of the world  
I love my hair, dear  
But I'm not gonna curl  
If I cut my hair, it's just me comin' off of the top  
Someone lost they spot  
If I come across as cocky, stop me  
I see, 'humble' is the new 'asshole'  
Well, I guess I have the worst rap flow  
Mad dough was the blessing I've received  
Blessings are the best lessons everyone receives  
You believe, you learn  
I need to learn  
To believe  
To give beats freezer-burn  
We could turn darkness into a large kiss  
From God's lips  
All pink, that's some Charles shit  
Aww, shit  
Hehe  
Hah  
Charles Hamilton

And you can be my starchaser tonight  
Don't be afraid of how fast you go  
You can see as far as lasers and lights  
Close your eyes and let it all go  
(Meet me in outerspace)  
Let the good times roll  
(I will hold you close)
