

The Solution

Charles Manson

Forever in
Forever in love
Forever in love
Forever in love
Love is everybody else
Love is everybody else, there's not only one
Everybody else, there's only one one
Only one god, one god, one god
One god, one god and one one one

Air
The air
Got to work for the air
You've got to protect the air
You've got to look out for the air
Everywhere
You must fight pollution!
The revolution
Against pollution
Is the solution
That's not too complicated for your brilliant minds to understand

You are so much smarter than I
It's true, it's true
You do all the things in that world
That involve what you do
What do you do? I don't do nothin'
Really don't do nothing
Honestly it doesn't do a thing, man
Everybody's always dipping into me man
What do you mean?
I mean [?] Eddie, take me and go down the road with me, make me
whatever they need me to be [?]
(mumbling)
