

## Bite

Charlie Cunningham

Keep hearing fear in your voice, it's troubling me  
Too near to the edge, much closer than I've been  
Pull back a step before you throw your stone  
They often see you stumble, the scene you want

If it's you  
If it's us  
If it's real  
It's enough

You said you won't come following me  
I said I don't know what to believe  
I won't say, I won't say you called  
I won't say anything at all  
Just do what they don't  
I can give you the most of anything you want

Stone cold faces let you keep  
Poisoning your blood  
Cut you open and you'll see  
Poison in your blood

Take what they will  
And do with it what they want  
I made no sense of it  
And I'm glad it's done  
It's hard to believe  
It was here all alone  
They took the best of it and left me with none

The stone cold friends that let you keep  
Poisoning your blood  
The same friends knock you when they need  
Poison in your blood  
Stone cold faces let you keep  
Poisoning your blood  
Cut you open and you'll see  
Poison in your blood
