

Stay With Me

The Charlie Daniels Band

Hey little girl with the big brown eyes
I can see you right through your disguise
One look at you and my heart's on fire
I promise my love will never tire

I can tell we're thinking the same
We've both got a tiger to tame
Why do we have to feel so bad, feel so sad?
If I could make you understand
I just wanna be your lovin' man
Come a little closer, look my way and hear me say

Stay with me a little while longer
Feel our love grow a little bit stronger
You and me ain't getting any younger
So stay with me a little while longer

Hey little lady with the wind blown hair
I've got a feeling I'd like to share
I can see you slippin' away
What can I do to make you stay?

We've been together for so long
How could we let things go so wrong?
Why do we have to feel so bad, feel so sad?
If I could make you understand
I just wanna be your lovin' man
Come a little closer, look my way and hear me say

Stay with me a little while longer
Feel our love grow a little bit stronger
You and me ain't getting any younger
So stay with me a little while longer

Stay with me a little while longer
Feel our love grow a little bit stronger
You and me ain't getting any younger
So stay with me a little while longer

Stay with me a little while longer
Stay with me a little while longer
