

Are You Still My Baby

Charlie Rich

I got such a thrill the first time that I met
you I knew in my my heart I'd never
would forget you but now when I speak
of love you just delay me and what I really
wanna know is are you still my baby?
(My baby)

Last night when I took you home your kiss
was colder, the flame that was out is starting
now to smolder I'm thankful for all those
happy times you gave me but what I really
wanna know is are you still my baby?
(My baby)

(Bridge)

You used to call me baby but now you just call my
name, I started thinkin' maybe you're ready to end
the game if you don't want me I'd wish you would
tell me now and stop pretendin' if you wanna go
take back the heart you been lending I just couldn't
stand it if you did betray me so what I really wanna
know is are you still my baby? (My baby)

My baby (My baby)
