

Wait For Me

Charlie Simpson

We walk beneath the winter sky
It was brighter than her mother's eyes
We were drunk and singing out of time to the carnival songs

But I've been cursed with the devil's heart
And a human mind that falls apart
So forgive me when I look in your eyes and tell you it's fine

So long my dear, oh I'll find you in another life
So long my dear, if only I found you in another time

There were whispers in the darkness
As the light made it's way through the trees
Won't you wait for me?
Won't you wait for me?

'Cause we are the ones
We are the ones letting go
Tonight we are the ones
We are the ones
We are the ones letting go
Tonight we are the ones

Oh until the morning

The evolution of a white lie to a sin
And so the corruption in my heart begins
The thief that stole life from your soul now he shadows his tears

I never set out to hurt or maim
But now your heart is left with the brunt of my pain
But no turns you away from me dear
They kept us the same

So long my dear, oh I'll find you in another life
So long my dear, if only I found you in another time

There were whispers in the darkness
As the light made it's way through the trees
Won't you wait for me?
Won't you wait for me?

'Cause we are the ones
We are the ones letting go
Tonight we are the ones
Just remember that
We are the ones
We are the ones letting go
Tonight we are the ones
We are the ones
We are the ones letting go
Tonight we are the ones
Won't you wait for me
We are the ones
We are the ones letting go
Tonight we are the ones

Don't make a sound
I will wait around for you
Hoping that I will see you in the morning

Oh when the morning comes
When the sun comes out
When the sun comes out yeah
When the morning comes
The sun comes over
