

12 Years

Charlotte Martin

Under the milky way
We talk talk talk, we talk talk talk it
About the ways we couldn't live without each other's silence

A breath of heavy
The depth of heaven
Wrapped in blankets on the floor

The fiercest kiss I know
A shock shock shock, you still can make me
Give into anything you wanted that could make you happy

And when I'm glitching
Your arms will catch me

We fight through the manic ocean
I signal for you
(Cover hover cover over, over me my love)
To bury the fire diamonds
And never look back
(Promise me to make it happen, chase me through the night)
I'm burning cause you still matter
The memory is steep
(Ice as cold as, ice as cold as fire)
There's so many little pieces
You're keeping of me
(Retrograding so microscopic, hydroplaning, changing the topic)

We're half way and high up
My heart flew over the cliff of you
But don't you forget you have got the power
To break me break me

Under the starry skies
Remembering we always wanted
Each other's everything to go
Way past forever

Sun rays
(I never say, I never say)
The first light
(I never say, I never say)
My body's returning
(I never say, I never say)
The lightening is weightless
(I never say, I never say)
The warring of angels
(I never say, I never say)
For us for us for us
(Enough enough enough)
For us for us for us
(Enough enough enough)
For us for us for us
(Enough enough enough)
