

Centre of the Universe

Charlotte OC

I always felt like I was on TV
Like everybody else was there for me
My own utopian reality
I always felt like I was on TV

Baby, as we get older, notice the moon don't follow you
The waves roll in, you'll always find your truth
Into the deepest ocean, we'll see a different blue
The currents change, the process changes too
And that's what makes you, you

I always thought I'd conquer my own death
I decide won't lie till my last breath
Until you tell me stuff is everybody else
I always thought I'd conquer my own death

Baby, as we get older, notice the moon don't follow you
The waves roll in, you'll always find your truth
Into the deepest ocean, we'll see a different blue
The currents change, the process changes too
And that's what makes you, you

I'm the center of the universe
I'm the center of the universe
I'm the center of the universe
You're the center of the universe too
I'm the center of the universe
I'm the center of the universe
And you're the center of the universe too

Baby, as we get older, notice the moon don't follow you
The waves roll in, you'll always find your truth
Into the deepest ocean, we'll see a different blue
The currents change, the process changes too
And that's what makes you, you
And that's what makes you, you
And that's what makes you, you
