

Feed

Charly Bliss

Melt the trophy, skirt disaster
Something's always coming after
Stupid cloud in a pointless sky
I secretly wish that these fishes would die

I would feed the whole world
I would feed the whole world if I could
I would feed the whole world
I would feed the whole world if I could

Lead your sweetest lamb to slaughter
Everybody's mom and daughter
Stronger men have failed to rescue
No one knows how to protect you
Foaming 'til we reach the top
You're satisfied but I can't stop
Save you from the milk expired
Jerk you if your hand's too tired

I would feed the whole world
I would feed the whole world if I could
I would feed the whole world
I would feed the whole world if I could
I would feed the whole world
I would feed the whole world
I would feed the whole world if I could
I would feed the whole world
I would feed the whole world
Feed the whole world if I could

Another day is doomed to you I won't believe it hurt instead
I wanna drink so much that I will never see myself again
Expanding every word is overselling I can tell and going
Dark...

I would feed the whole world
I would feed the whole world if I could
I would feed the whole world
I would feed the whole world if I could
I would feed the whole world
I would feed the whole world
I would feed the whole world if I could
I would feed the whole world
I would feed the whole world
I would feed the whole world if I could
