

Carry You

Chef'Special

It's a simple dream
It's a simple dream that we started
But we don't know what simple means anymore

We've been rolling with the punches they say it's all part of the game
Where everyone can be a winner but there's no prize that you can claim

It's a simple dream and I hope that you still believe

'Cause it feels sometimes
Like one big cloud
You're running for the exit
But there's no way out
It's a rope of sand
A great mirage
This could be the view from halfway down
There's not much that I can do
But I can carry you
Carry you

We're living free
That's all we need in this moment
And I don't think I could've made it this far alone

We've been going the distance they say it's all part of the game
Where no one gets to be a winner unless you fight your own flame

It's a simple dream and I hope that you still believe

'Cause it feels sometimes
Like one big cloud
You're running for the exit
But there's no way out
It's a rope of sand
A great mirage
This could be the view from halfway down
There's not much that I can do
But I can carry you
Carry you

Beyond the mountains
Beyond the sea
Beyond their judgement and all the things they said you'd never be
Shine on me sunshine
Rain on me cloud
I'll carry you through the fire if that's the only way out

It's a simple dream that we started
And I don't think I could've made it this far alone
Sometimes I feel we're only just getting started
It's a simple dream and I don't wanna dream it alone

'Cause it feels sometimes
Like one big cloud
You're running for the exit
But there's no way out
It's a rope of sand

A great mirage
This could be the view from halfway down
There's not much that I can do
But I can carry you
Carry you
Carry you yes I can
Carry you
Carry you
Carry you

Beyond the mountains
Beyond the sea
Beyond their judgement and all the things they said you'd never be
Shine on me sunshine
Rain on me cloud
I'll carry you through the fire if that's the only way out
