

## New Start

Chef'Special

I wanna be in your heart I wanna be in your light  
Make me dance in the dark keep me up all night  
This could be a new start

I wanna be in your heart I wanna be in your light  
Make me dance in the dark keep me up all night  
I wanna be in your heart I wanna be in your light  
And it will never be the same it started off with a  
Spark turning into a flame  
This could be a new start

Turn the page another round  
I'm on my way a new chapter  
Take a break slow it down

Day after day I feel it happening  
I try to shed my skin  
So I can feel new so I can feel you

I wanna be in your heart I wanna be in your light  
Make me dance in the dark keep me up all night  
I wanna be in your heart I wanna be in your light  
And it will never be the same it started off with a  
Spark turning into a flame  
This could be a new start

My winter sleep was bittersweet  
The realest dreams and no ending  
I only wanna close my eyes to witness something brighter  
I only wanna make the jump if I know it frightens me

I'm waking up alive why make up for lost time  
If I can feel new if I can feel you

I wanna be in your heart I wanna be in your light  
Make me dance in the dark keep me up all night  
I wanna be in your heart I wanna be in your light  
And it will never be the same it started off with a  
Spark turning into a flame  
This could be a new start

The page must be blank for it all to appear  
I'll take your hand if you embrace my fear  
There's always a chance that we end up back here  
The page must be blank for it all to appear  
This could be a new start
