

Borderline

Chenoa

All this time, all this time you've been right in front of me
All this time, all this time you've been standing right there

Like a match you strike me up
Like a drug can't get enough

We're on the borderline
I feel sparks fly
We're standing on the borderline
There is no turning back this time

I've been up, I've down and you've always been there
When I'm looking left, looking right, looking at the wrong guys

You're like a match you strike me up
You're like a drug can't get enough

We're on the borderline
I feel sparks fly
We're standing on the borderline
There is no turning back this time

We're on the borderline
I see the danger in your eyes
Standing on the borderline
There is no turning back this time

We're standing on the border, border
We're standing on the borderline
We're standing on the border, border
Who's gonna cross it first tonight

We're on the borderline
I feel sparks fly
We're standing on the borderline
There is no turning back this time

We're on the borderline
I see the danger in your eyes
Standing on the borderline
There is no turning back this time

We're standing on the borderline
