

# Paradise Is Here

**Cher**

You say, you want to live some  
Move out into the fast lane  
You say you need excitement  
To make you come alive

Some place, a million miles  
From the shadows that surround you  
I look for your attention  
You're lost out in the future

Where lovers ask no questions  
And shadows never fall  
Some pilgrim bound for paradise  
No compromise, paradise is here

It's time to stop your crying  
The future is this moment  
And not some place out there  
Tonight I need your love

Don't talk about tomorrow  
Right now I need your loving  
Right now give it to me  
Right now I want your loving  
Right now, now, now, now

You talk about your new plans  
To move up on the stairway  
Your dream about the high life  
That's waiting for you there

A world of fame and fortune  
That's just around the corner  
But I don't need no high life  
To make me feel a real man

And I don't need to reach for  
No castles in the sky  
Just put your arms around me  
Devour me 'cause paradise is here

It's time to stop your crying  
The future is this moment  
And not some place out there  
Tonight I need your love

Don't talk about tomorrow  
Right now I need your loving  
Right now give it to me  
Right now I want your loving  
Right now, now, now, now

Tonight I need your loving  
Paradise is here
