

Big Bang

Cherry Glazerr

You don't have to tell me
The end was just beginning
What did you think I didn't notice?
Made up a story for us
Oil and water they don't mix
The truth was hiding under the surface

I still call you when I need escaping
You go on and on and on and on and on
Catching everything I've thrown at you
Forgetting all the bad shit that I've done

I don't wanna make you my lifeline
Love, I don't wanna make you mine
I don't wanna make you mine

You can be my best friend
We don't have to pretend
We can start over with a big bang
Cuz it was easy for us
Can I count on you to be the one
Don't leave me hiding under the surface

I still call you when I need escaping
You go on and on and on and on and on
Catching everything I've thrown at you
Forgetting all the bad shit that I've done

I don't wanna make you my lifeline
Love, I don't wanna make you mine
I don't wanna make you mine

Out with a big bang
Out with a big bang
Out with a big bang
(I still call you when I need escaping)
Out with a big bang
(You go on and on and on and on and on)
Out with a big bang
(Catching everything I've thrown at you)
Out with a big bang
(Forgetting all the bad shit that I've done)
