

# december blues

chevy

It's colder this December  
No, I don't really remember  
Ever shivering while holding you this tight  
And I haven't seen the snow fall  
Though I don't think it would help at all  
It's colder this December for me

I'm sorry I'm not feeling festive  
It's to do with my perspective  
It's to do with what I'm seeing on the news  
And this weather's bound to bore us  
My dear, this isn't for us  
I'm so done with these December blues

So if the season  
Gives you a reason  
Just say you'll always be right here  
And could you repeat it?  
'Cause I just might need it  
This year

This winter isn't colder  
We're just slowly getting older  
We're just slowly getting tired of the snow  
But if growing old together  
Means talking 'bout the weather  
It was colder six Decembers ago  
It was colder six Decembers ago

And if the season  
Gives you a reason  
Just say I'll always have you near  
And could you repeat it?  
'Cause I just might need it  
This year

So hold me tight  
And we'll make it through the night  
If December's lost its charms  
Let me miss them in your arms

And if the season  
Gives you a reason  
Just say you'll always be right here  
And could you repeat it?  
'Cause I just might need it  
The future's so unclear  
So please be the reason  
I get through the season  
This year
