

second nature

Chevy

I'm getting used to everything that you do
You've been stealing all my jokes and my heart too
There's no reason you gotta play cool
'Cause I've already got you

Oh we don't really have to try
With you there's no second guessing
It's just like you're reading my mind
Baby tell me why this feels so right?

Oh with you lovin' is simple
I swear I'm obsessing over all of the little things you do
The one I was made for
Could never replace you
It's second nature with us two

I think that we were meant to be
It's like I found the missing puzzle piece
And now I'm feeling so complete
It's so easy to see

Oh we don't really have to try
With you there's no second guessing
It's just like you're reading my mind
Baby you know that this feels so right

Oh with you lovin' is simple
I swear I'm obsessing over all of the little things you do
The one I was made for
Could never replace you
It's second nature with us two

It's second nature with us two
