

# For The Love

Chicago

Long ago, far away  
I recall every day  
At the time every thought was for the love  
Might've been city light  
Three o'clock day or night  
Didn't sleep, couldn't sleep  
And every thought was for the love  
Didn't know I would care  
City sounds in the air so alive  
Every thought was for the love  
Will July come to pass  
Once again? Raise a glass  
Say a prayer, have a dance  
And every thought was always for the love

For the love  
All the years go rushing by  
For the love  
All our hopes are still the same  
For the love  
Long ago and far away  
For the love

I believe all the way  
Every sense habitué  
By and by, every thought was for the love  
Moon of gold over town  
Cobblestones cooling down  
Summer night, tender days  
Every thought is for the love

For the love  
All the years go rushing by  
For the love  
All our hopes are still the same  
For the love  
Long ago and far away  
For the love

And we live for the love  
And we live for the love, yeah  
And we live for the love  
And we live and we live for the love  
And we live for the love  
And we live for the love, yeah

For the love  
And we live for the love, yeah  
For the love  
And we live and we live for the love  
For the love  
And we live for the love, yeah
