

You go wherever that the lightning goes  
I know you're hurting but it barely shows  
I wonder where you are when your eyes close  
You give me more than I was asking for  
You are the light, you are my only source  
Are you the one?  
Are you the one?  
Are you the one?  
Are you the antidote?

I'm out of practice  
I'll let gravity have this  
And if you're asking if I'm all in  
It's automatic  
Sadness will always know sadness  
Oh how it's everlasting

You go wherever that the lightning goes  
I know you're hurting but it barely shows  
I wonder where you are when your eyes close  
You give me more than I was asking for  
You are the light, you are my only source  
Are you the one?  
Are you the one?  
Are you the one?  
Are you the antidote?

Breathless  
You left me breathless  
With the lights out  
Baby you're so electric  
Baby you're so electric  
Baby you're so electric

You go wherever that the lightning goes  
I know you're hurting but it barely shows  
I wonder where you are when your eyes close  
You give me more than I was asking for  
You are the light, you are my only source  
Are you the one?  
Are you the one?  
Are you the one?  
Are you the antidote?
