

Eventually

Chiiild

We don't have to drag this thing on for another day
Life gets better when we're lovers and not enemies
We're both wrong but if you want I'm down to take the blame
Whatever you want whatever you need babe

I know eventually
You will fall for me baby
And then you'll want me back
I know you want me bad
I know eventually
You will fall for me baby
And then you'll want me back
I know you want me bad

Don't you go pull on your parachute
You know what comes of forbidden fruit
I know you want me bad
Don't you go pull on your parachute
I know you want me bad

Where'd you go love
What can I do so you reappear
There's no point of storming off if we're both sleeping here
We're both wrong but if you want I'm down to take the blame
Whatever you want whatever you need babe

I know eventually
You will fall for me baby
And then you'll want me back
I know you want me bad
I know eventually
You will fall for me baby
And then you'll want me back
I know you want me bad

Don't you go pull on your parachute
You know what comes of forbidden fruit
I know you want me bad
Don't you go pull on your parachute
I know you want me bad
