

## Sunrise

Chikinki

Sometimes like when I'm all alone you call me up on the telephone

And say take, take, take me to the Cro Bar

Where we can drink some cold beer in the corner

Out of everyone I've ever known you're the only one to show to me there's something to be and there's something going on

You take the dark skies and turn them into sunrise

And when there's dark skies I'll follow you to the sunrise

Uh oh!

When the time bell rings we've got to move on

We've got to find some place to get a groove on

We've got to hunt for something less boring

Where there's a chance to dance until the morning

Out of everyone I've ever known you're the only one to show to me there's something to be and there's something going on

You take the dark skies and turn them into sunrise

And when there's dark skies I'll follow you to the sunrise

Someday when I'm a little older and the winters feel a little colder

And I will shake, shake, shake when I don't want to and all the moves I make are too painful

I'll remember you as ray of sun

The one who really did love everyone

I say out of everyone I've ever known

You're the only one to show to me there's something to be and there's something going on

You take the dark skies and turn them into sunrise

And when there's dark skies I'll follow you to the sunrise
