

## Complacency No Vacancy

Children Collide

Tie me down in the night and give me the day  
I've been sailing a ride but I came home to play  
Yeah you taught me the wrongs and you read me the rights  
Lay down in the dark and you turned on the lights

Riding comets like they're unicorns  
We race through time and space  
All the planets and the galaxies  
Are ours to taste and waste

Show me the design, teach me mathematics  
Kidnap complacency kids and create new fanatics  
You were reading my palm so you could put me to bed  
Follow me to the grave, we can dance with the dead

Riding comets like they're unicorns  
We race through time and space  
All the planets and the galaxies  
Are ours to taste and waste

Now that bird has flown  
We can be alone

Riding comets like they're unicorns  
We race through time and space  
All the planets and the galaxies  
Are ours to taste and waste
