

# Heavy Metal

Chinchilla

Since I was a young boy , I saw metal bands in big halls  
They came down to play in town, I went to see their shows  
Metal heroes on stage, they've come to bring us rock  
Well, it's more than a religion and since then it's our law

Metal put us all together, now we are so strong  
Now showing the whole world, we're friends forever, on and on  
So it's not important where you live or where you're from  
We will stand together 'till we are all gone

Heavy metal that's our law  
Gives us power for the future  
For us it's the only real  
Way to live and die  
Heavy metal that's our law  
And I swear for ever long  
It's in our veins and hearts  
And we'll never be lost

So my biggest dream came true, I only want to rock  
Up on every stage to play, from Berlin to L.A.  
So quickly I realized, without fans we can't exist  
'Cause they will stand by our side in good times or in bad

Thanks from all the metal bands, all over the whole world  
Without you and your power, we are nothing here on stage  
'Cause fans are our air to breathe, the motor for our work  
To see the yelling pack of hounds, that's the only thing we need
