

Around Around Around

chokecherry

Facing the blade
A million directions
All to the face
I call you at midnight
Put feeling to name
And then I was spinning
Circling the drain
And forgot who to blame

Spinning around
Can't catch me now
I'll see you around

Around, around, around, around, around
Around, around, around, around, and around
Around, around, around, around, around
Around, around, around, around, and around

Scattered visions
Got better when you're not around
Thought I was missin'
What's better than that
I guess I'll see you there
The outside
I've got a feeling
Worn down
Just lying around
Yeah, I'll see you

Around, around, around, around, around
Around, around, around, around, and around
Around, around, around, around, around
Around, around, around, around, and around

(Around, around, around)
(Around, around, around)

Around, around, around, around, around
Around, around, around, around, and around
Around, around, around, around
Around, around, around, and around
Around, around, around, around, around
