

Goldmine

chokecherry

And the thought, it makes me sick
I just want you to know
That I couldn't stomach it
Maybe, you'll love me some other day
Maybe, you'll love me some other way
Oh, some sort of fate
Dreamlike, dreamlike
Overflows
Go alone

Don't bite, I'm on the other side
Goldmine, tastes just like a fire
I'm tied, to the open sky
Don't lie, tastes just like a fire

I miss it when, miss it when
When your car was waiting there
I miss it when, miss it when
I could feel you everywhere

If it's too heavy, we can dumb it down
Crashing through you, couldn't see through the glare
Fell apart, so I ran out of town
If I dream it, I can feel you right now
Don't bite
It's too heavy, can we dumb it down?
Goldmine, tastes just like a fire
Crashing through you, couldn't see through the glare
I'm tied
Fell apart, so I ran out of town
Don't lie, it tastes just like a fire
If I dream it, I can feel you right there

I miss it when, miss it when
When your car was waiting there
I miss it when, miss it when
I could feel you standing here
I miss it when, miss it when
When your car was waiting there
I miss it when, miss it when
I could feel you everywhere
