

## Rocket

Choker

Inhabit this sequence  
In spite of your recent  
In height eye to the season  
I breathe in the range  
The repetition keeps me decent  
I could descent but you  
Put turbo into my insole  
I'm good on the strength  
Out in Van Nuys eating pad thai  
With a man from the Emerald Isle  
I Uber back it takes a while  
He understands I'm tired  
So he keeps the radio quiet for me

FM or AM  
Agenda awaken  
The tender awaken  
You make what you pay  
Enough in a phrase  
Don't lead me astray  
We'll make it a day  
You make what you pay  
And the sound held like a baby skeleton  
Shame the tele don't tell you when he wrong  
(So long overdue, gone like Blockbuster  
Far like star cluster)  
Spider waltz with the silk  
Samurai touch the hilt  
Skyframe so far  
Skyframe so near  
I didn't ask and you didn't offer  
Stay isolated like Kobe in Staples  
The denim from Naples Italy  
Progression meet nature, history  
We puffing a face full, giving tree  
My niggas we racing, living free  
Are you living me or forgetting me?  
Mono e mono, nigga get a fee  
Call in a favor, use sidekick or razor?  
You dead over paper, the fetti, the skrilla  
My time is important, I'm petty I'll bill you  
Pay up my nigga

Rockets chasing rockets, Mars fit in jars  
Gardens in my pockets, we won't make it far  
Drawings on my arms, stickers on your car  
Similar in sentiment, I did my part

I'm not absolved of attachment. Foreign motion is foreign feeling, is recognizable but ultimately incomprehensible. The language evades me, it's hands on a leash with no pet. Or maybe it's the pet, or what the pet chases. All I can do is lead the search party. Take not what I need, but what I'm capable of holding

Not only occurring, but immersed  
Slept on the floor, the fan by the door  
Kept on through June

I kept on with you, I kept on with you  
No ETA, no reaching  
May divinities play referee, between us  
Why would I depend on motivation?  
So inconsistent rather focus on intention  
Quick to mention accomplishments  
To show that we're invested in ourselves  
Deepak chopra on my health, cleaner chakra aura swell  
Scene from mothra tore my shell, showed my ass, might as well, might as well  
Sunny D my iris, peering into bangles  
Striped up Cincinnati, dread strong since a natty  
Rather see a nigga laughing, Morrissey I see nowhere fast  
You don't make me explain, I appreciate, When it's

Understood, understood, understood, understood  
Understood, understood, understood, understood

Save some Atlantis for me, save some Havana for me  
Blading through 'beca like Lucio, save some Mecca Mercutio  
Plague on your cribbo, if you leave me here  
We play it by ear, you play in my hair  
So I can forget all the troubles we share  
I try to erase it, I brace for the pavement  
You saving to live in a LA in a year  
I'm painfully aware of my surroundings, at all times  
To say I feel it is an understatement and to hold a body is to know elation  
But I keep evading, mmm  
Keep braking, mmm  
Deep woosa, make ammends  
Big Bankroll, change a man  
To the world, till the end

Understood, understood, understood, understood  
Understood, understood, understood, understood  
Understood, understood, understood, understood
