

Sweet Dreams

Choking Victim

This song goes out to all the victims of American terrorism,
and all the dumb fucks with Gulf War Syndrome
This goes:

Disease in your bloodstream,
genocide by chemical means,
its too late for apologies,
governments are always trying to kill someone.

now you will die, toxic fire, government lies

government wants to use you,
the government chemists create a brew,
simply provided to kill you,
biological warfare is nothing new.

now, its too late. meet your death, toxic flames.

Disease in your bloodstream,
genocide by chemical means,
its too late for apologies,
governments always wanna kill someone. (3x)
666!
