

Can't nobody replicate this feeling  
Got me feeling high, never low  
I just want to say I really really love you baby

Got this money and a big ol' place, I've been sitting pretty  
Hit the town searching for ladies  
Then I came across this sweet thing  
Her beauty was glory  
Wait, wait, wait, leave her alone  
Don't you break it  
Don't fall, you might not get up  
That girl has an early hold on you  
Early hold on you

Can't nobody replicate this feeling  
Got me feeling high, never low  
I just want to say I really really really love you baby  
Can't nobody replicate this feeling  
Got me feeling high, never low  
I just want to say I really really really love you baby

Sit down, listen, I gotta bare my soul  
I can't not just, I can go on and on  
I can never make 'em stay, I just wanna give my name  
She would tell me 'know my love and remember'  
Her essence alluring  
She thinks we should go away  
These feelings are foreign but  
They won't go away  
And they're here to stay

Can't nobody replicate this feeling  
Got me feeling high, never low  
I just want to say I really really really love you baby  
Can't nobody replicate this feeling  
Got me feeling high, never low  
I just want to say I really really really love you
