

Beyond The Mystery

Chris August

I know science can explain the way the heart is made
It can teach you every feature of the human race
But there is something that it simply cannot illustrate
It can't understand the part of a man where God communicates

The spirit in the soul
The secret place I go
Where the infinity
Breathes into me
Beyond the mystery

Has the universe existed through eternity?
If outer space has ends, I'd like to see them personally
There is no booth that can unhook the mind to make it free
It's hidden inside, revealed through Christ
The only key to

The spirit in the soul
The secret place I go
Where the infinity
Breathes into me
Beyond the mystery

I know I'm standing on some dirt
Spinning round a ball of light
A little speck in space called earth
Where you came and gave me life
And the only truth I have
I hold deeper than my mind
What you want to be revealed
Yeah seek and ye shall find

The spirit in the soul
The secret place I go
Where the infinity
Breathes into me
Beyond the mystery
