

# Moonlight

Chris August

Night falls blindness  
I fall silent  
In these shadows  
That remain

I wait  
Still I trust you  
Your light cuts through  
With the brilliance of a flame

Just like the light up in the sky  
The stars hanging in the night  
From the start through the dark  
There you are sure as the sun comes up  
And the moonlight hits the ground

Sunrise diamonds your light shining  
Shining brighter like a spark in the dark

Just like the light up in the sky  
The stars hanging in the night  
From the start through the dark  
There you are sure as the sun comes up  
And the moonlight hits the ground

I'm yours, I'm yours  
I know I am  
You hold the stars  
You hold my heart  
In your eternal hand

Just like the light up in the sky  
The stars hanging in the night  
From the start through the dark  
There you are sure as the sun comes up

Just like the light up in the sky  
The stars hanging in the night  
From the start through the dark  
There you are sure as the sun comes up  
And the moonlight hits the ground

You placed your light up in the sky  
Made us reflect it to light up the night

From the start  
Through the dark  
You were there sure as the sun comes up  
And the moonlight hits the ground
