

Something

Chris August

One is one until someone comes
And turns it into two, two
And yeah, two is so much better than

Going through life on my own
I'm ready for that someone
And baby, that someone is
You are my only, my all
Everything means nothing
Unless I've got something with you, you, you, you

Three is complete
It's God, and it's you, and it's me
And before I was yours
Something was missing
But it's not anymore

And going through life on my own
I'm ready for that someone
And baby, that someone is
You are my only, my all
Everything means nothing
Unless I've got something with you, you, you, you

Every single day I've been
Patiently just praying and
Baby, you are more than worth the wait
For the rest of my days
Till my life is through
I want to just spend them with you

I've been going through life on my own
I'm ready for that someone
And baby, that someone is
You are my only, my all
Everything means nothing
Unless I've got something with you, you
Unless I've got something with you, you, you
Baby, my something is you
