

Scared To Love You

Chris Brown

You got my heart, one and only
You got my trust so baby I'mma never let you down, woah
You're the one I need right now and your body is like wow
Everything just, everything just, everything just revolves around you

Ey come baby tell me what's up, you already know me girl, what's up
Ain't nobody here baby, it's just us and I'm just in, understand?
Girl I hope you're ready for the backseat action, got a taxi driver
I'll go any, girl I'll go every and girl I'll go anywhere with you

Hey little love of mine
Can you spend a little more time with me baby?
I'm sure it'll be just fine
I'm not scared of loving you, I know baby

I don't get in your heels that's made to walk in, girl gon' and take 'em off
I just wanna see you shake it, show a little skin, she said "I don't need to break it off"
So maybe tell me, just what you wanna do now?
Cause I'll do any baby, I'll do every, I'll do anything for you

Hey little love of mine
Can you spend a little more time with me baby?
I'm sure it'll be just fine
I'm not scared of loving you, I know baby
