

## The 80's

Chris Brown

When the sun goes down  
Record rebrown, the horizon comes to life  
Blue electric eye  
The feeling that haunts me keeps me up at night

Do you know where do we go  
When we're both stuck in the cold?  
City lights, they wait in the dark

So if the feeling's nice, we'll never say goodbye  
We'll just replay the 80s, go to a place where we can hide  
Only your love can save me  
I'm lost in a world of yellow skies, your paradise, paradise

When the rain falls down  
Watch me clean, baptized up in your love, ay  
Many dreams are found  
Pulling me deeper, deeper to the light so

Do you know where do we go  
When we're both stuck in the cold?  
City lights, they wait in the dark

So if the feeling's nice, we'll never say goodbye  
We'll just replay the 80s, go to a place where we can hide  
Only your love can save me  
I'm lost in a world of yellow skies, your paradise, paradise

This is nostalgic  
This is our journey so don't stop believing  
And you know that I got this  
Constantly playing, oh let me going back in time

So if the feeling's nice, we'll never say goodbye  
We'll just replay the 80s, go to a place where we can hide  
Only your love can save me  
I'm lost in a world of yellow skies, your paradise, paradise  
So if the feeling's nice, we'll never say goodbye  
We'll just replay the 80s, go to a place where we can hide  
Only your love can save me  
I'm lost in a world of yellow skies, your paradise, paradise

Back to the 80s, when music was your life  
We can have the greatest time  
Back to the 80s, the perfect time  
We're back in time
