

# Up To You

Chris Brown

What the hell babe,  
Damn I ain't never felt this way  
Somebody, somebody, tell me  
I don't have a clue what to do  
When it comes to you  
Baby, you're so beautiful  
Every time I see you girl, it throw me off  
It's so unusual  
For me to be waiting  
But I don't want to blow it girl,  
But you should know this girl

I'm not gonna be the one to mess this up  
Cause I done effed up in love before,  
I'ma be the one to take a back seat girl  
We can take our time and  
you can run this, Stay in, go out,  
Anything you want girl, we can do  
Girl are we going down, I don't know,  
But from here now baby I'm gone leave that up to you,  
I'ma leave it up to you

What the hell babe  
make me wanna jump out an airplane  
The way it feels, I just can't explain  
I don't wanna lose it, so I'm just gone stay out my own way  
Baby, you're so incredible (you're so beautiful),  
every time I see you girl, it throw me off  
It's some kind of special (unusual)  
So I'm gone keep waiting  
But I don't wanna blow it girl,  
But you should know this girl...

I'm not gonna be the one to mess this up  
Cause I done effed up in love before,  
I'ma be the one to take a back seat girl  
We can take our time and  
you can run this, Stay in, go out,  
Anything you want girl, we can do  
Girl are we going down, I don't know,  
But from here now baby I'm gone leave that up to you,

I'm not tryna be a heart breaker, like I was before  
(that was the old me)  
I've made so many tears, I don't wanna make no, make no more  
so give me your list, yes I'm checking things off  
ready to go to work, baby you can be boss  
and I'm okay with it, ain't gone play with it  
so baby girl, it's your call

I'm not gonna be the one to mess this up  
Cause I done effed up in love before,  
I'ma be the one to take a back seat girl  
We can take our time and  
you can run this, Stay in, go out,  
Anything you want girl, we can do  
Girl are we going down, I don't know,

But from here now baby I'm gone leave that up to you,  
leave that up to you
