

Glitter, the lights shine
They never see what's lying
Behind make-up and madness the children start to wonder
And we do wonder daily if we'll ever will find peace
As the angel is smiling, the seasons upon us
Can we all take the time to escape in the mind of the child and
find.

Who brings the joy, not the pain to our lives today
Winter's alive, with snowflakes all around
Towards the New Year we climb
Hope and love our brother's now
Like a bridge over time
Princes and Kings and wise men They're not wiser
Than the children in the spring, without price tags, the plastic
smiles
They still play til the end of the mystery and the day dreams
Can we learn from the innocent, love thy neighbors, not their screams
Can we all take the time to escape in the mind of the child and
find.

Who brings the joy, not the pain to our lives today
Winter's alive, with snowflakes all around
Towards the New Year we climb
Hope and love our brother's now
Then Christmas arrives, enlightens the closed mind
Like a bridge over time.
Like a bridge over time
