

# You Might Want to Think About It

Chris Cagle

Before you tell me how loud I can play my music  
Before you tell me the way I should raise my keys  
Before you try to tell me what to say  
You might wanna think about it, yeah  
Before you turn my family farming to a strip mow  
Before you move another factory overseas  
Before you go giving my job away  
You might want to think about it, yeah  
Think about this land that we live in  
Of the rights we've been given  
And people who die to make us free  
Maybe you should stop thinking about the fight you've been pick  
ing  
And the butt-kicking you'll get from me  
You might want to think about it, yeah

Before you try to take away my ten commandments  
Before you try to tell me when and where to play  
Before you go messing with my fate  
You might want to think about it, yeah

Think about the choice that you're making  
And the stance that you're taking  
Before you come rolling down my street  
Maybe you should stop thinking about the fight you've been pick  
ing  
And the butt-kicking you'll get from me  
The eyes whipping you'll get from me

Before you go and try to take away my freedom  
Before you go and try to take my voice away  
Before you go and make a big mistake  
You might wanna think about it  
You might wanna think about  
You might want to  
You might want to  
You might wanna think about it
