

GEMINI

Chris Grey

Danger and desire
Walking in "red bottoms"
Pleasure and pain
Grabbing on my collar

Tastes like Nirvana
My belladonna
She's all over my body
Got me covered in karma

Caught in her tornado
Her love is fatal
She ain't sent from heaven
She got horns in her halo

She tells me that she loves me while she's digging in the knife
Looking like an angel with the devil in her eyes
Her love's got two faces and I face them every night
Gemini, Gemini

Standing with a smile while she's digging out my grave
She knows that I wouldn't want it any other way
Her love's got two faces and I face them every night
Gemini, Gemini

Pretty little liar
Got me going under
Burning in the rain
There's no taking cover

Looks like temptation
Just what I'm craving
She's all over my body
'Til my conscience is fading

Caught in her tornado
Her love is fatal
She ain't sent from heaven
She got horns in her halo

She tells me that she loves me while she's digging in the knife
Looking like an angel with the devil in her eyes
Her love's got two faces and I face them every night
Gemini, Gemini

Standing with a smile while she's digging out my grave
She knows that I wouldn't want it any other way
Her love's got two faces and I face them every night
Gemini, Gemini

Oh Gemini
She's my Gemini
Gemini
Gemini

All the things that I'd do for her
Lose for her

The way I'd make heaven and earth move for her
Sin for her
Live for her
There's nothing I wouldn't do oh I'd kill for her
