

# River Road

Chris Knight

Well there's a cinder block juke joint down by the river side  
It's where I carry my cash from the working week  
They got a waitress that'll turn your head  
Bring you catfish and cornbread  
Beer bustin' out of the keg like its springin' a leak

The band in the corner don't do nothin' but rock 'n' roll  
They ain't learned one new song since bad to the bone  
But the women get up on their feet  
To anything with a good back beat  
And if you dance with them long enough  
You might take her home

So drive till you can't drive no more  
Till the road runs out and green water rolls  
Think you've gone as far as you can go  
Well the party's just getting started on river road

Well there use to be a ferry to carry you on across  
But you can still see the lights of the city from the parking lot  
Anyway nobody seemed to care what they got goin' on over there  
Cause us people on the river we're happy with what we got

So drive till you can't drive no more  
Till the road runs out and green water rolls  
Think you've gone as far as you can go  
Well the party's just getting started on river road

So drive till you can't drive no more  
Till the road runs out and green water rolls  
Think you've gone as far as you can go  
Well the party's just getting started on river road

Yeah the party's just getting started on river road
