

# Fire We Found

Chris Lane

Ain't nothing like the fire we found  
Some kind of heat between you and me  
I don't think that we'll ever burn out  
Might smoke when it rains  
But it won't go away

Like a blacktop running through the Delta  
See it rising off the lines in the road  
Like a cigarette burning at the end  
And you feel it in your fingertips every toke  
Hotter than your feet running through  
The sand in the Carolina Dunes  
Lightning striking down on some thirsty ground  
Spreading out like California wild

Ain't nothing like the fire we found  
Some kind of heat between you and me  
I don't think that we'll ever burn out  
Might smoke when it rains  
But it won't go away  
The flames'll get higher and higher and higher  
So high, it ain't ever coming down  
Ain't nothing like the fire we found  
Like the fire we found

Out in the middle of nowhere  
Sticks all stacked up, little midnight glow  
And that twenty foot blaze had nothin' on the flames  
That we started back in the corn rows  
One little spark and it ignited, you couldn't fight it  
No, you can't deny

There ain't nothing like the fire we found  
Some kind of heat between you and me  
I don't think that we'll ever burn out  
Might smoke when it rains  
But it won't go away  
The flames'll get higher and higher and higher  
So high, it ain't ever coming down  
Ain't nothing like the fire we found  
Like the fire we found

Ooh, like the fire we found  
Yeah, like the fire we found  
Ain't nothing like the fire we found  
Might smoke when it rains, won't go away  
Baby, we ain't ever gonna burn out  
There's some kind of heat between you and me

Ain't nothing like the fire we found  
Some kind of heat between you and me  
I don't think that we'll ever burn out  
Might smoke when it rains  
But it won't go away  
The flames'll get higher and higher and higher  
So high it ain't ever coming down  
Ain't nothing like the fire we found

Like the fire we found

Ain't nothing like the fire we found  
Ooh, baby, like the fire we found  
Ooh, like the fire we found  
Like the fire we found
