

# Every Christmas Brand New

Chris Medina

When you came into this world I was changed to the core  
Heard about something called Christmas spirit, I never felt it before

But now I want all that for you  
Wanna see your dreams come true

So this Christmas you'll see the snow for the first time  
We'll see new songs and you will hear the bells chime  
I see the world like I've opened my eyes for the first time  
'Cause it's all about you, every Christmas brand new

Every day you surprise me as you're growing strong  
You will discover all kinds of magic that I've taken for granted so long  
And I will laugh at what you say and do  
Saying Santa stole your daddy's shoes

There'll be a Christmas you'll escape for the first time  
Walk round the tree and watch the Christmas light shine  
I see the world like I've opened my eyes for the first time  
'Cause it's all about you, every Christmas brand new

You'll find someone that makes you feel like you but complete  
Who'll take up space in your heart but will make it grow bigger with every beat  
And will be proud to watch you break the mold  
Though it sometimes leaves us feeling old

There'll be a Christmas we'll be alone for the first time  
Missing you here but know you're happy gives peace of mind  
Talking 'bout when you opened our eyes for the first time  
'Cause it's all about you

Oh, there'll be a Christmas we're in your home for the first time  
Laughter and sounds from the cradle will make your eyes shine  
You'll see the world like you've opened your eyes for the first time  
You see, it's all about you, every Christmas brand new

When you came into this world, I was changed to the core
