

Full Time Thing

Chris Miles

I can't drive, I ain't the last guy
Playin chicks is my past time
Gotta lock you up, no bad crimes
Got you on my call list
Every city and province
You and I we can't call quits, can't see us like we behind dark tints
You're so wild, animal
We're Wiz Khalifa and Amber Rose
The damage is collateral
You Marilyn so classical
With that lipstick, made up, that make up and caked up
But me and you, we look fine
And I can love you full time

I said I might be too young and love is not certain
And everybody's tellin me things ain't gonn work and
If I can pull strings and give you all my love
We'll make a full time thing for us
And I be on my work thing, day and night
And I be busy baby, but we can make things right
If I can pull strings and give you all my love
We'll make a full time thing for us

Look, I've been tryina make it for a minute, it's ridiculous
Music on my mind, that has been my only interest
Headed for the top, I could use a little pixie dust
And we be on the grind, you and I are not equivalent
I am just a kid who be dreamin bout the dream
Livin life in the present like it be under the tree
Got a different direction than anybody you seen
And I got a small circle it's just me and my team but
I've tryna bring a girl into the situation
It would be me and her, not concerned with the kids who hating, ah
Enough with the contemplating, I got time on my hands
And I don't mind if you waste it
Trying make it big in the rap game
You can be catwoman I'm batman
Yeah, you and I, that's it
I be shootin for the stars like NASA
I just want to be by my side
And if you don't believe these words than you can listen to Pryde, I'm out

I said I might be too young and love is not certain
And everybody's tellin me things ain't gonn work and
If I can pull strings and give you all my love
We'll make a full time thing for us
And I be on my work thing, day and night
And I be busy baby, but we can make things right
If I can pull strings and give you all my love
We'll make a full time thing for us

You know that I'm on the road right now
If only I had you here somehow
If I were in front of you know it would be going down
Whoa, yeah

So girl, what you be thinkin bout my question

You be take my hand, or maybe just insant message
Hit me on my twitter, and just overload my mentions
And yeah, you be lookin incredible, if I forgot to mention, ha
Tryna get you in my arms, you're swaggin a million by far
You shine so much you could blind stars
You could be my queen, I ain't talkin bout monarch-y
Just you and me, we are going places you ain't never seen
Never been that kinda love that never end, my girlfriend

I said I might be too young and love is not certain
And everybody's tellin me things ain't gonn work and
If I can pull strings and give you all my love
We'll make a full time thing for us
And I be on my work thing, day and night
And I be busy baby, but we can make things right
If I can pull strings and give you all my love
We'll make a full time thing for us
