

too long

Chris Miles

Yeah

My mind takes me places that I never been
And time flies by like ashes that blow in the wind, yuh
But you can't take it back
Everything you ever said, but I'm OK with that
Now everything is standing still just like a photograph
The sun is shining, you should come outside
So, baby, come outside

Because it's been too long
Since you had a good-ass time
Yeah, it's been too long
Don't you let them kill the vibe
Baby, just keep going
Shit ain't been the same like before
No, it's been too long, whoa

Last night, I was fucked up, yeah, I can admit
Every time I say I'm sorry, it doesn't mean shit, uh
Then I fade to black
Know there's nothing I can do, 'cause you can't change the past
I was falling down, broken, like I'm made of glass
The sun is shining, you should come outside
So, baby, come outside

Because it's been too long (Ooh)
Since you had a good-ass time
Yeah, it's been too long (Ooh)
Don't you let them kill the vibe
Baby, just keep going
Shit ain't been the same like before
No, it's been too long, whoa
